

## **Dental Clinics for the Major Secondary Colleges**

This project will help to equip dental clinics being created within the three Major Secondary Colleges in the country, Apifo'ou College, Queen Salote College and Tupou College.

They will service the dental needs of the pupils, staff, and local community. They will also provide some hands-on experience for students who wish to pursue a dental career.

**August 2022** The goods have been shipped and much of the work has done.

This is Apifo'ou College Dental Clinic, ready for the final fit out by the RAWCS Volunteers, when they visit in August 2022

Much of the equipment and supplies were repurposed items that would have become landfill without this project.

The project also received significant support from equipment suppliers, Donations In Kind West Footscray and the RAWCS Tonga Volcano Eruption and Tsunami Disaster fund.

**This is an ongoing project and partnership opportunities are available.**
